About Freemium SaaS II

Thank you for purchasing the Freemium SaaS II theme!

Designed for marketing a SaaS (Software as a Service) application, Freemium SaaS II includes six different layouts and a modifiable pricing grid. This documentation contains notes on Freemium SaaS II's code files to help you customize the theme to your needs.

Page Layouts

Types of Layouts

Freemium SaaS II uses six different layouts in its design:

- Homepage (home.html)

- About or Help (about.html, help.html)

- Blog (blog.html)

- Blog Post (blog-post.html)

- Tour (tour.html)

- Contact Us or Sign Up (contact-us.html, sign-up.html)

Page Layouts

Homepage Layout

The homepage (home.html) is a two-column layout with an image gallery, Free Trial button, a live Twitter feed, and a separate section near the bottom to display feature sets.

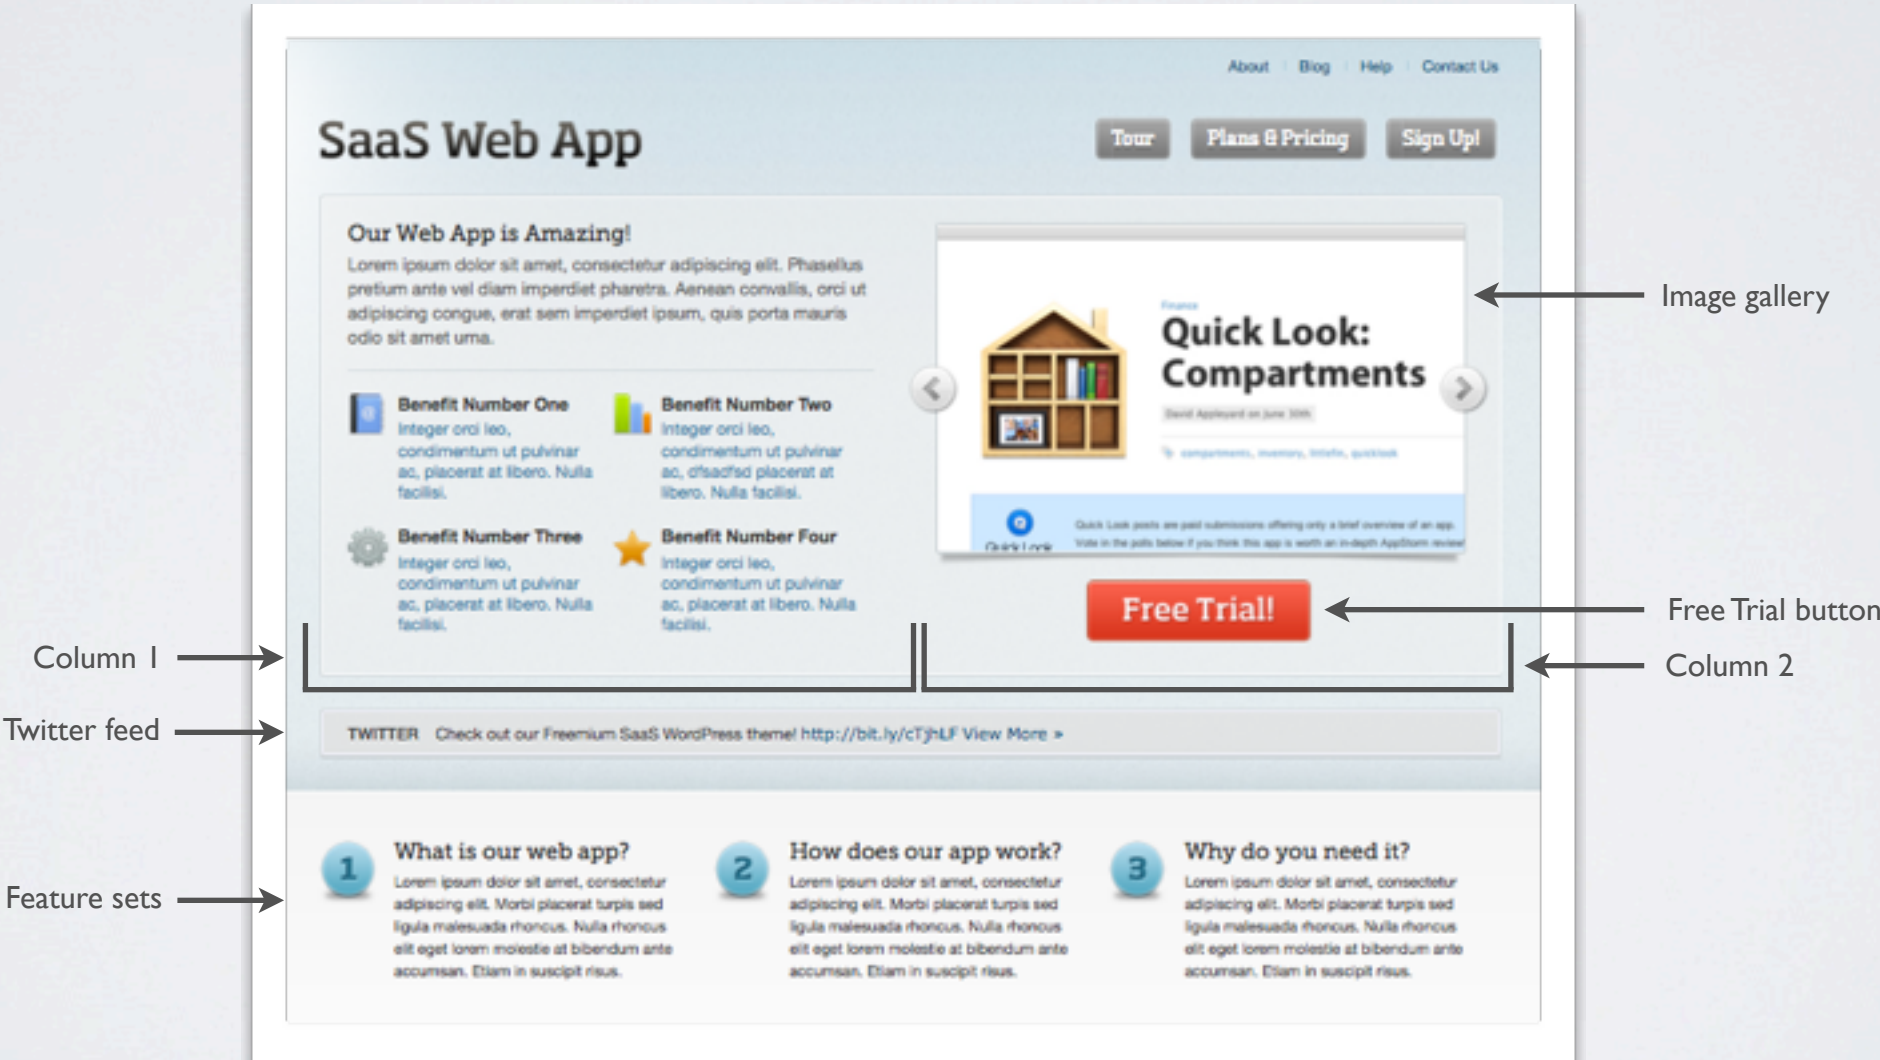

Figure 1

Page Layouts

The following tags can be found in home.html:

<div class="topLinks"> and **<div class="nav">**: The two menus at the top, right-hand side of the page. Please see the "Menu Navigation" section for notes on menus.

<div class="tweets">: The Twitter feed.

<div class="proms">: The two columns (see Figure 1) that make up most of the page's layout.

<div class="half left">: The left column, which contains **<div class="intro">** for the main message header and content (see the homepage section with the header "Our Web App is Amazing!" in Figure 1). It also contains **<div class="benefits">** for the "Benefit" sections below the main message.

<div class="half right">: The right column, which contains **<div class="slider">** for the image gallery and **<div class="call-to-action a-center">** for the Free Trial button.

<div class="features3">: The feature sets below the main content.

Page Layouts

About or Help Layout

The About and Help pages (about.html and help.html) have the exact same layout. The layout has one column and can include a "Try Us" button.

Figure 2

Page Layouts

The following tags can be found in both about.html and help.html:

<div class="page-title">: The page's title and the "Try Us" button. The button is tagged by **<div class="right">**.

<div class="entry">: The page's main content. The image can appear on the right or left side by adding the class **alignleft** or **alignright**.

Page Layouts

Blog Layout

The Blog page (blog.html) has a two-column layout with a sidebar used to navigate blog entries. There can also be a "Try Us" button at the top of the page.

Figure 3

Page Layouts

The following tags can be found in blog.html:

`<div class="page-title">`: The page's title and the "Try Us" button. The button is tagged by `<div class="right">`.

`<div id="sidebar">`: The sidebar, which can appear on either the right or left side by using the class `sidebar right` or `sidebar left`. Each section in the sidebar is tagged by `<div class="widget">`.

`<div id="content">`: The blog post listings. Each listing is numbered (`post-1`, `post-2`, etc.) in the tag. For example, the first listing would have the tag `<div class="post-1 post type-post hentry category-uncategorized">`.

Page Layouts

Blog Post Layout

The Blog Post pages (blog-post.html) display a blog entry's full content. These pages have a two-column layout with a sidebar similar to the one on the Blog layout and a section at the bottom where visitors can leave comments (Figure 4b). There can also be a "Try Us" button at the top of the page.
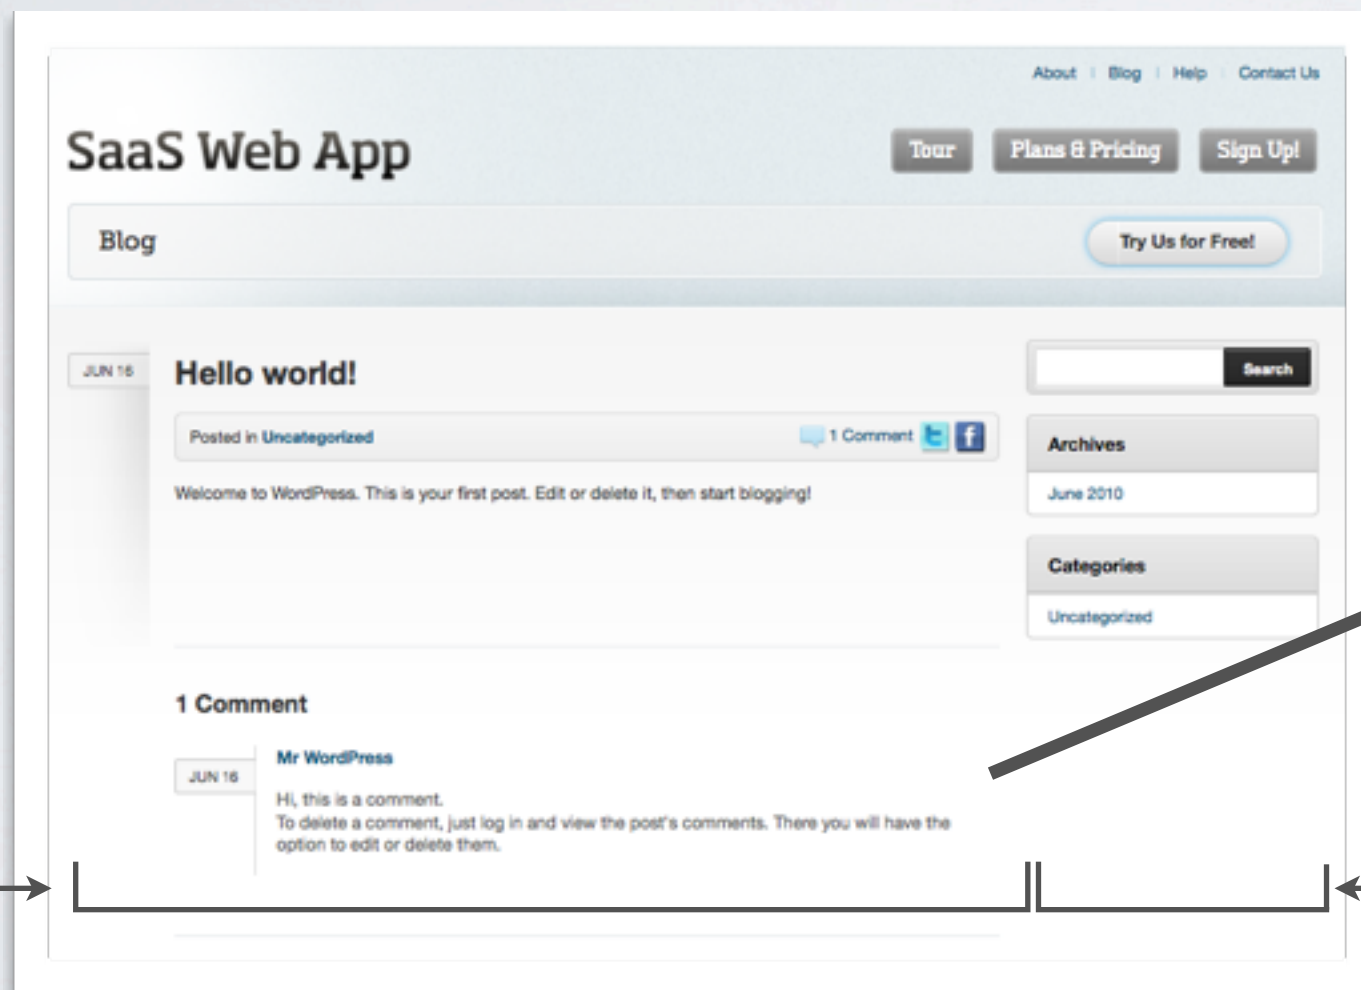

Column 1

Column 2 (sidebar)

Figure 4b

Figure 4a

Page Layouts

The following tags can be found in blog-post.html:

`<div class="page-title">`: The page's title and the "Try Us" button. The button is tagged by **`<div class="right">`**.

`<div id="sidebar">`: The sidebar, which can appear on either the right or left side by using the class **`sidebar right`** or **`sidebar left`**. Each section in the sidebar is tagged by **`<div class="widget">`**.

`<div class="content">`: The blog posts. Each post is numbered (**`post-1`**, **`post-2`**, etc.) in the tag. For example, the first post would have the tag **`<div class="post-1 post type-post hentry category-uncategorized">`**.

`<div class="comments-box">`: Comments left by visitors regarding the post.

`<div class="contactDiv commentform">`: The form where visitors can leave their comments.

Page Layouts

Tour Layout

The Tour page (tour.html) has a two-column layout with a feature set menu on the right side. There can also be a "Try Us" button at the top of the page.

Figure 5

Page Layouts

The following tags can be found in tour.html:

<div class="page-title">: The page's title and the "Try Us" button. The button is tagged by **<div class="right">**.

<div class="feature-sets">: The feature set menu (column 2 in Figure 5) and the main content. The feature set menu is tagged by **<ul class="submenu">** and the main content is tagged by **<ul class="clear">**.

Page Layouts

<u>Contact Us or Sign Up Layout</u>

The Contact Us and Sign Up pages (contact-us.html and sign-up.html) have the same two-column layout with a contact information box on the right side, but use different types of forms. There can also be a "Try Us" button at the top of the page.

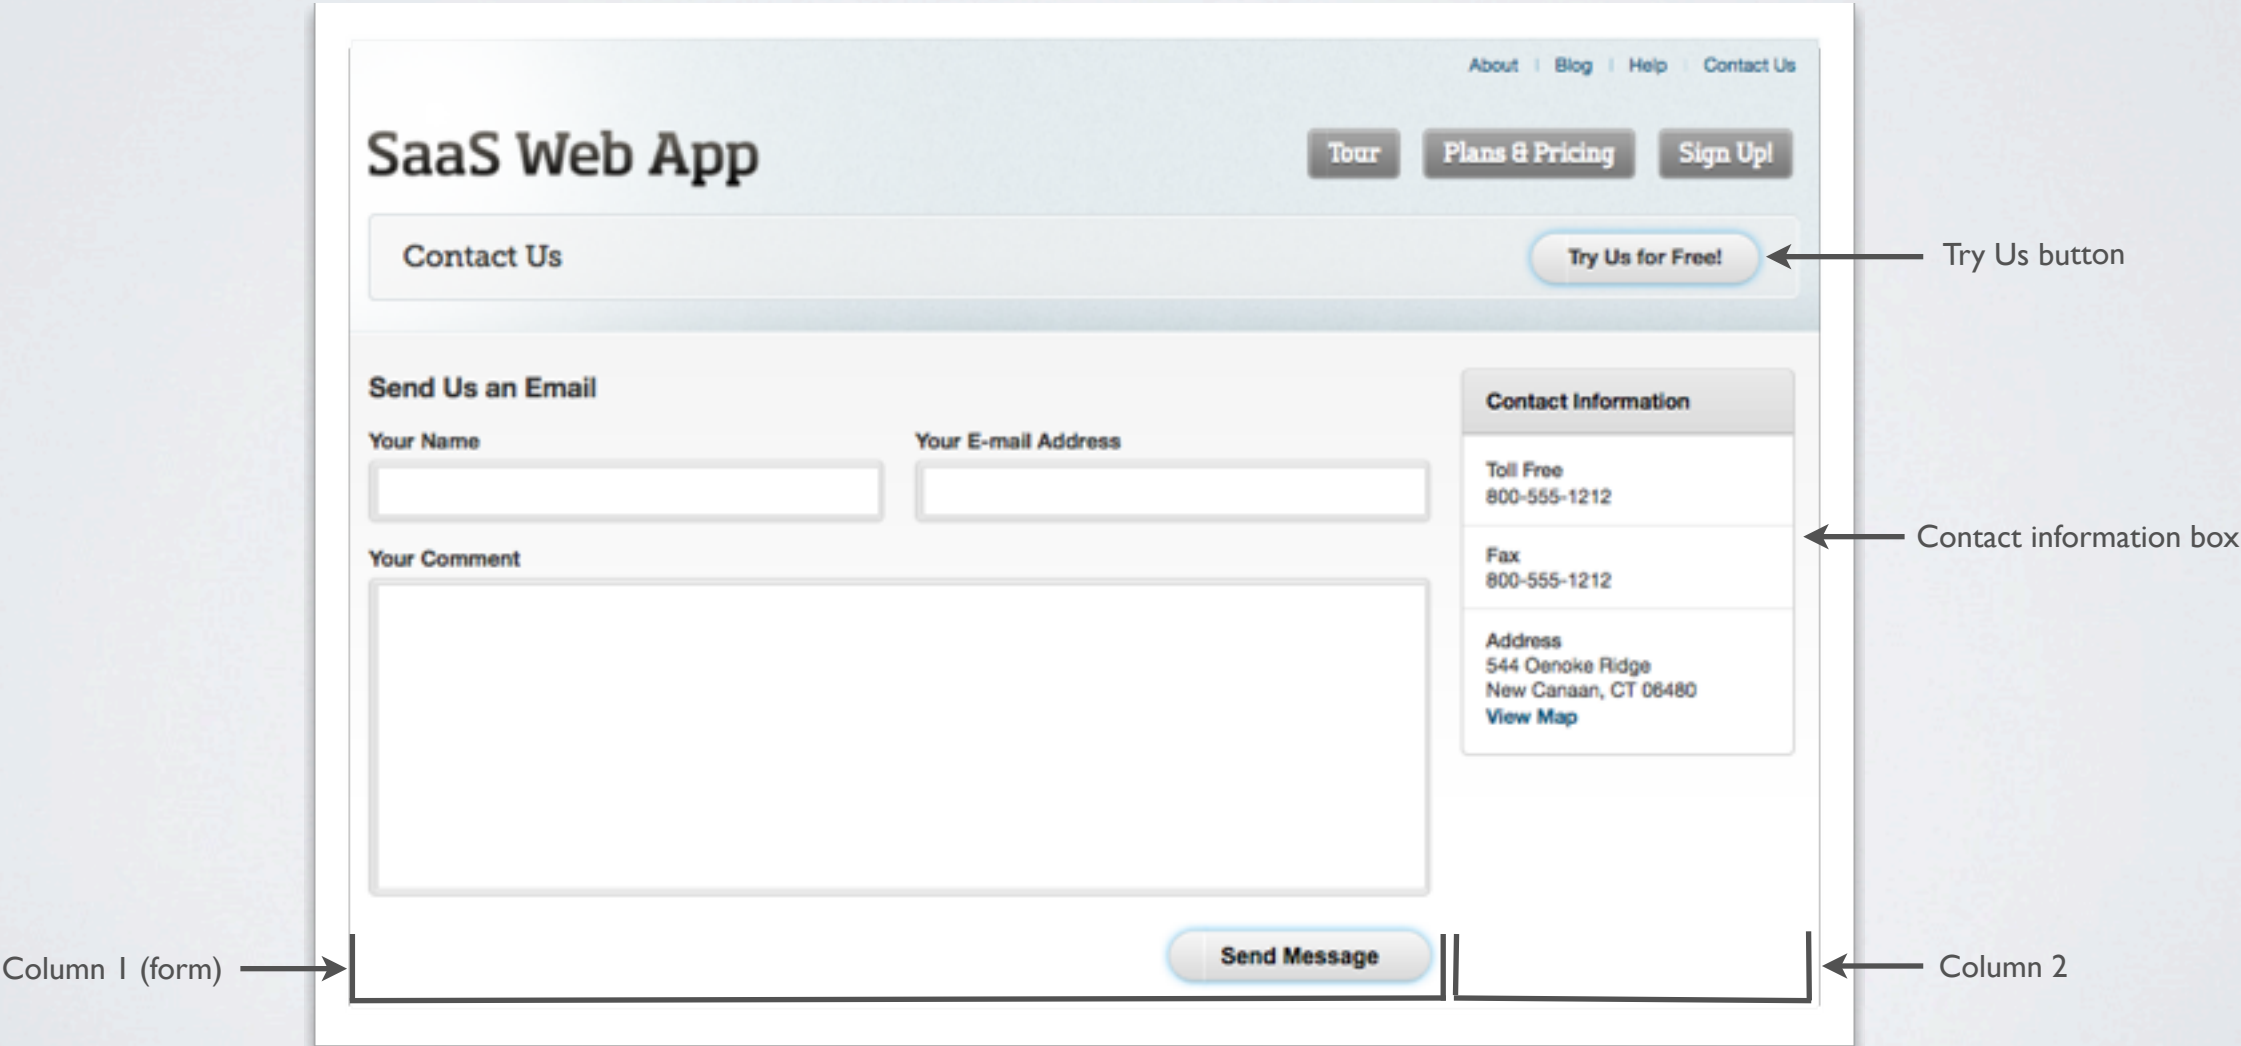

Figure 6

Page Layouts

The following tags can be found in both contact-us.html and sign-up.html:

<div class="page-title">: The page's title and the "Try Us" button. The button is tagged by **<div class="right">**.

<div class="sidebar right">: The contact information box (column 2 in Figure 6).

<div class="content">: The contact form or the sign-up form.

Pricing Grid

The pricing grid (plans-pricing.html) is one of Freemium SaaS II's most notable features and can be added to your website to outline different pricing plans. There is also a section below the grid to include feature sets.

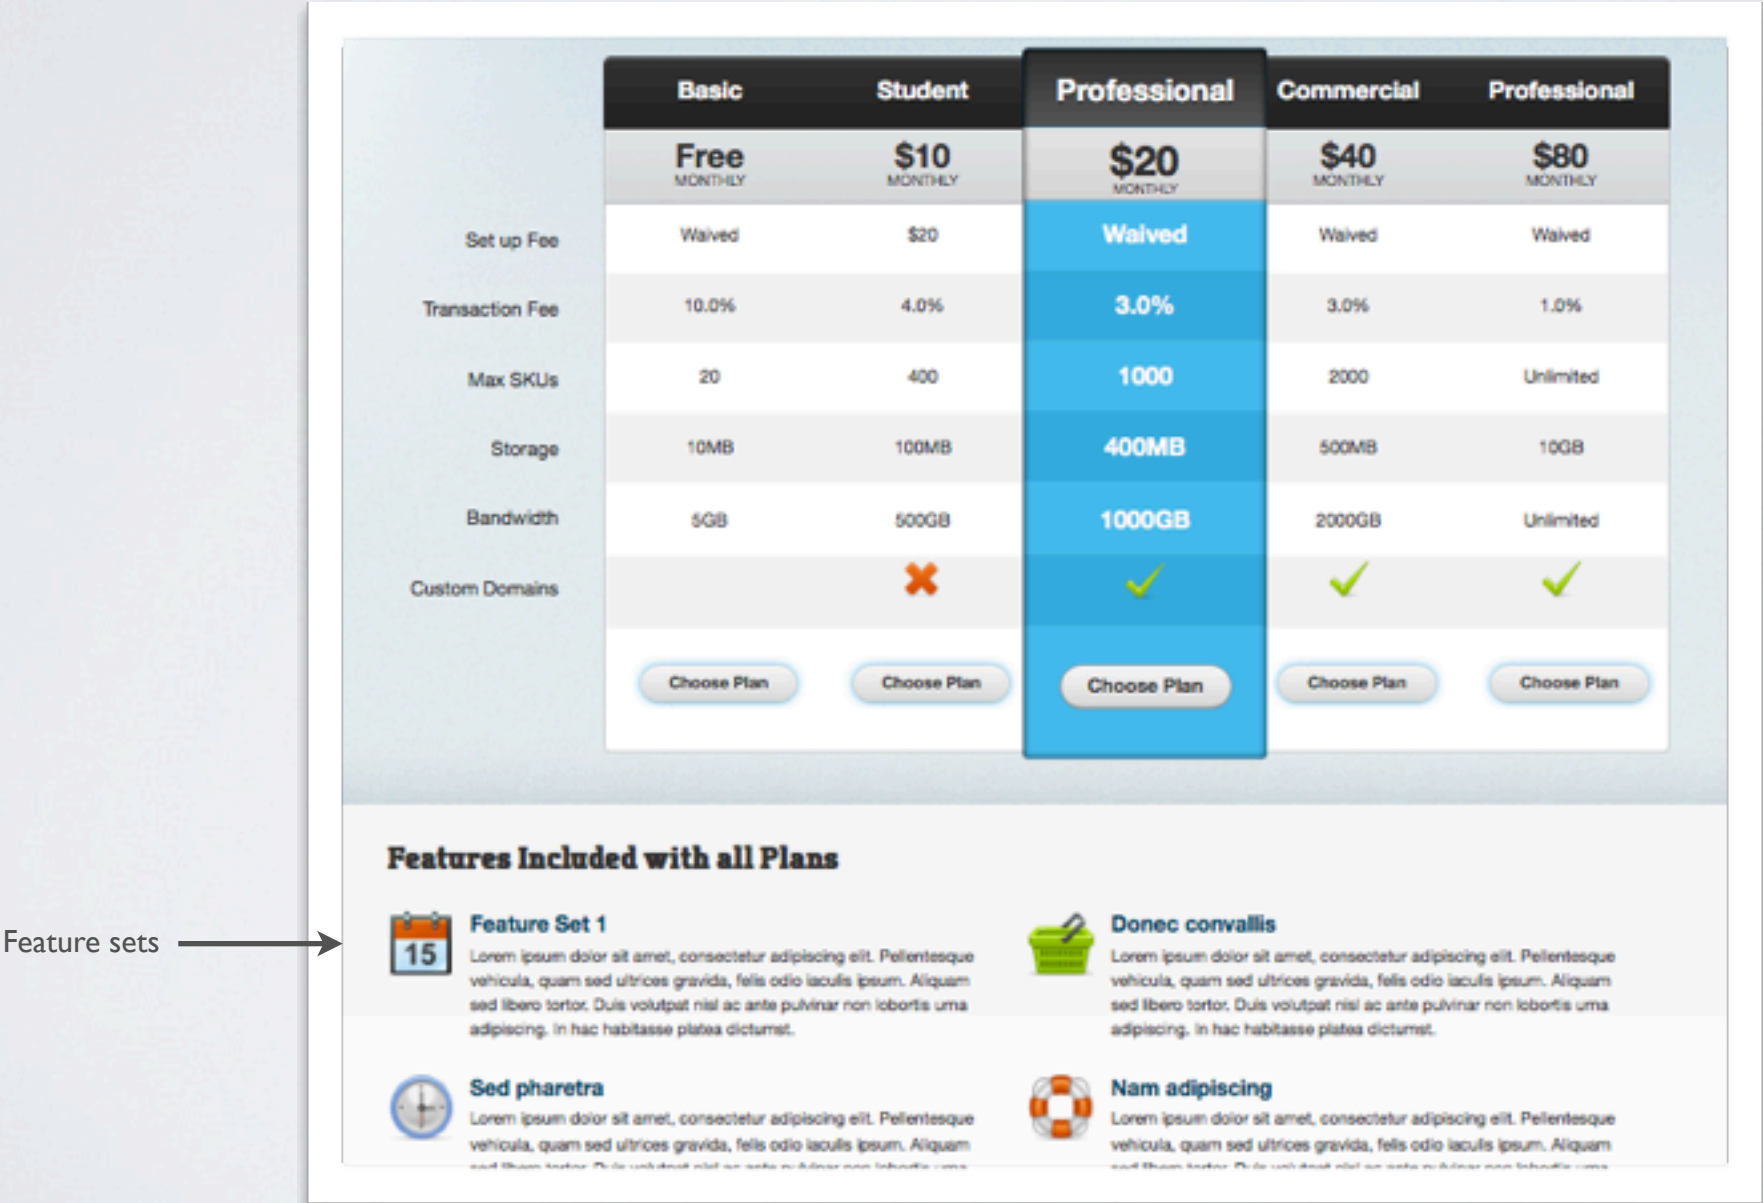

Feature sets

Figure 7a

Pricing Grid

A pricing grid requires the following JavaScript files:

jquery.js: `<script type='text/javascript' src='js/jquery/jquery.js?ver=1.4.2'></script>`
saas.js: `<script type='text/javascript' src='js/saas.js?ver=3.0'></script>`

In saas.js, initialize the grid hovers in the section below. Grid hovers enable the columns to enlarge when the mouse hovers over them.

```
/**
 * Pricing Grid
 */

var $grid = $('div.grid');
var $_div = $('div.grid > div');

$grid
.find('section:first')
.addClass('first')
.end()
.find('section:last')
.addClass('last')
.end()
   .height($_div.height());

var $gridSections = $grid.find('section');

$gridSections.hover
(
function()
{
$gridSections.removeClass('on');
$(this).addClass('on');
}
);
```
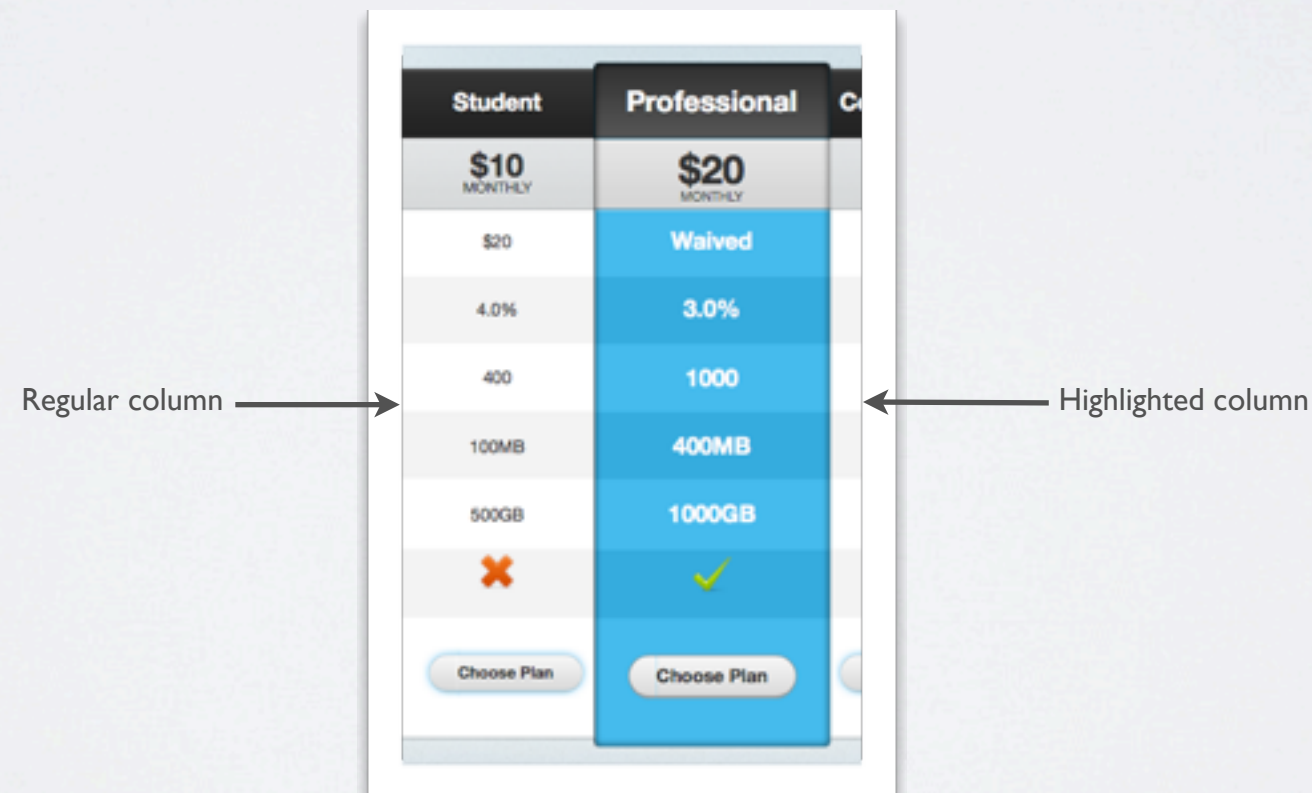

Pricing Grid

The following tags can be found in plans-pricing.html:

`<div class="grid">`: All of the grid's content. Before the code for the columns begins, row labels can be added with the tag **`<aside>`**.

`<div class="sections col5">`: The grid columns. Each column is tagged by **`<section>`**. If you want a column highlighted when the page first loads, add class **on** to the section tag (i.e. **`<section class="on">`**). A highlighted column distinguishes itself from the other columns by "popping out" at the viewer (see Figure 7b).

Regular column

Highlighted column

Figure 7b

Pricing Grid

The last row in each grid must include **`<li class="last">`**.

`<div class="tooltip">`: An optional feature that can be added to any row. With this feature, a box appears when the mouse hovers over a particular row (see Figure 7c).

Figure 7c

`<div class="features4">`: The feature sets below the pricing grid.

Menu Navigation

Freemium SaaS II has two sets of menus: the top navigation menu and the main navigation menu.

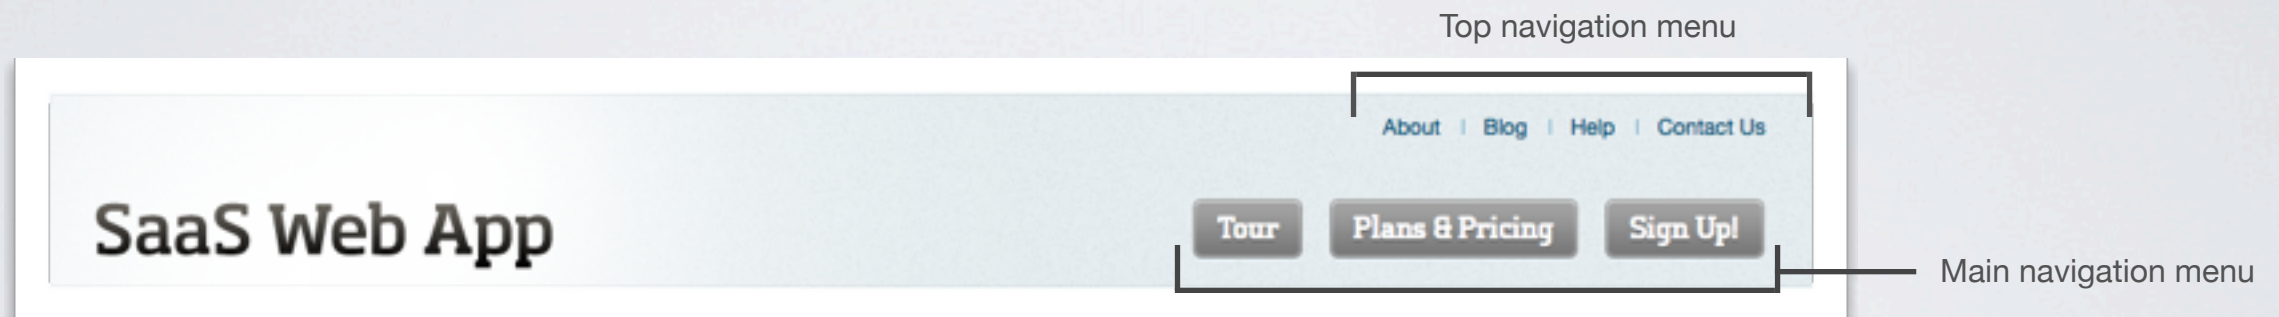

Top navigation menu

Main navigation menu

Figure 8a

Menu Navigation

The sample HTML below shows how the menus' code is structured. This code is on every page of the website.

```html
<div class="topLinks">
    <div class="menu-top-links-container">
        <ul id="menu-top-links" class="menu">
            <li class="menu-item"><a href="about.html">About</a></li>
            <li class="menu-item"><a href="blog.html">Blog</a></li>
            <li class="menu-item"><a href="help.html">Help</a></li>
            <li class="menu-item"><a href="contact-us.html">Contact Us</a></li>
        </ul>
    </div>
</div>
<h1 id="logo"><a href="#"><img src="images/logo.png" alt="SaaS WP Theme II" /></a></h1>
<div class="nav">
    <div class="menu-main-nav-container">
        <ul id="menu-main-nav" class="menu">
            <li class="menu-item"><a href="tour.html"><span>Tour</span></a></li>
            <li class="menu-item"><a href="plans-pricing.html"><span>Plans &#038; Pricing</span></a>
            </li>
            <li class="menu-item"><a href="sign-up.html"><span>Sign Up!</span></a></li>
        </ul>
    </div>
</div>
```

Additional Help

If you need further assistance, please contact the Theme Team by filling out a contact form at http://themeforest.net/user/goThemeTeam.

Thank you for purchasing the Freemium SaaS II HTML theme!
